

CDP partners with eTimeMachine to provide integrated Time Sheet and Project Management Solutions.

Charlotte, North Carolina, March 11, 2009 – CDP Inc, a leading provider of Primavera/Oracle Project Management Solutions, has joined the eTimeMachine Partner Program to provide CDP clients with access to a P6 integrated time sheet solution. eTimeMachine is an Enterprise time sheet application and task manager solution that is able to be integrated with any Accounting or ERP System and is compatible with both Primavera and Microsoft scheduling tools. The Primavera P6 integration allows organizations to capture detailed time and expense data and have it incorporated into their P6 Projects and Portfolios.

"CDP is excited to offer our customer base and the Primavera/Oracle user community a robust and integrated time sheet application", said Paul Riefenberg, President of CDP. "We were looking for value added solutions for our customers, and were impressed with the capabilities of eTimeMachine, and the success they have had working with Primavera customers. Capturing time and expenses against your project with eTimeMachine will improve our P6 clients' ability to more accurately report Earned Value and forecast with more with more confidence." Mr. Riefenberg also added, "CDP was equally impressed with how eTimeMachine is using technology to provide easier timesheet collection. eTimeMachine provides timesheet collection via handheld devices, email, web or client server user interfaces providing CDP clients more flexible options for deployment."

About CDP, Inc.

Headquartered in Charlotte, NC, with offices in Richmond, VA, and Columbia, MD, CDP is recognized as a leader in helping organizations reach their goals by improving their enterprise-wide project management capabilities. CDP has been successful in providing exceptional project management services to leading corporations around the country for over 25 years.

CDP is an authorized representative of **Oracle** | Primavera System the worldwide leader in PM Software Solutions. Additionally, CDP is a Certified Primavera Service Provider offering our clients full the knowledge, tools, implementation, training, and resources necessary to help manage projects more effectively.

One failed project can eliminate an entire year's profit.

Primavera helps you eliminate the surprises that can keep your organization from managing projects profitably.

The Primavera integrated project management solution provides you with:

- Role-based dashboards
- Productivity-based forecasts
- Easy-to-read graphical trends
- Custom reports

Primavera is an integrated product that goes far beyond scheduling providing you with advanced collaboration tools, action alerts and centralized project information.

All team members are critical to a project's success. Whether you are VP, Director, Project Manager or a Team Member, you get the information you need for your role, the way you need it.

CDP Professional Services can help clients make the most of their decisions, accelerating client organization's adoption of project management processes and tools through an intelligent, well designed implementation strategy. CDP's experts bring to clients a uniquely powerful combination of project management and technological expertise. CDP consultants have worked in nearly every industry, on nearly every type of project, and are equally proficient in leading-edge database and project management technology. CDP consultants have implemented Primavera solutions for customers with a wide variety of environments, providing services from short-term support and integration with ERP to full-scale, global rollout. CDP is also committed to complete knowledge transfer both during and after the implementation process, so the client's organization can smoothly pick up where our Professional Services team leaves off.
